

Comparison of The Hunger Games Film and Novel:

by Adam Hassan

p.5

similarities:

Both the film and the book of *The Hunger Games* depict the dystopian world of Panem, highlighting the stark divide between the wealthy Capitol and the impoverished districts. This setting reinforces the theme of oppression and control, as the Capitol uses the Hunger Games to remind citizens of its dominance. In both versions, media manipulation plays a crucial role, with the Games broadcasted as a form of propaganda to instill fear and maintain control over the districts. This setting and theme establish the oppressive atmosphere that drives Katniss's journey and the underlying rebellion.

Similarities in Plot and Character:

The book and film share key events like Katniss volunteering for Prim and surviving the Games, highlighting her bravery and determination. Her connections with Peeta and Gale remain central in both. The Mockingjay symbol, representing hope and rebellion, is also important in both versions, showing Katniss as an inspiration against the Capitol.

Diffrance between film and novel :

One major difference between the book and the film is perspective. The book is told from Katniss's first-person point of view, allowing readers to know her thoughts and emotions deeply. The film, however, uses a third-person perspective, showing scenes outside of Katniss's view, like President Snow's reactions and the Gamemakers' control room. This shift adds more context to the Capitol's manipulation but reduces the focus on Katniss's inner thoughts. Additionally, some scenes and character details are simplified or altered in the film for time, changing certain relationships and emotional depth.

Differences in Themes and Perspective:

A major difference between the book and film is how they present themes and endings. The book gives insight into Katniss's thoughts, making her struggles feel personal, while the film focuses more on President Snow, reducing her inner conflict. The Mockingjay symbolizes hope in both, but is developed more subtly in the book. Lastly, the book explores Katniss's trauma and relationships in depth, while the film offers a simpler ending that lacks emotional depth.
